TOUR NAME

***The Caves Of Castellana***

The ground below Castellana is honeycombed with caves, which burrow to a depth of 210 feet. Centuries ago, these underground caverns acted as natural storage containers for farmers, until stories of resident monsters and ghosts scared locals into avoiding the area completely. They were uncovered again in 1938, and nowadays they're a popular spot with holidaymakers. You'll have an hour or so to wander through the 2-mile complex, admiring the spiky rock formations that decorate the caves. Visit the Grave, with its natural skylight, and the White Cave, which features a crystal-covered basin and milky-white stalagmites. Make sure you bring a jumper with you – temperatures down here are a lot cooler than above ground.

### SPECIAL NOTES

TOUR INCLUDES

**DRIVER & GUIDE**

**HALF DAY TOUR**
